

Delightful shades of beauty

Etacon, is made of peoples likes you, who are concerned about designing, Constructing and installation quality of product for the commercial and residential. We are custom manufacturer of not only tensile structure but also creative canopy. Etacon manufacturing company located in Gurgaon Delhi NCR. We are specialized in designing fabrication in installation of tensile structure using PVC coated, PVDF coated, Tio2 coated PTFE fabric.

About Us – Know us better

Etacon was established in the year 2004 and has over the years emerged as a prominent manufacturer and suppliers. Etacon is one of the best Indian tensile structure manufacturer company bases of Gurgaon Delhi NCR. Most creative and experienced speclist in architectural tensile fabric structure working with directly with client as well as architect real their vision. We are always happy to work superior innovative architectural tensile structure outdoor and indoor PVC, PVDF coated PTFE membrane with 5-15 years warranty, we will take profession complete design, fabrication, installation, project management & maintance.

Designing

Our team of professional structural engineering and designers. The client's requirements precisely and approach them in a technically ethical manner. Offering them the desired output reaching to his expectations in term of technically specification meeting the requirements tensile structure. Precisely our works involve innovation development of creative ideas and solution.

Advantage:

1. Creative looking
2. Provide safe air environment
3. Green building solution
4. Protect , harmful Uv ray and rain
5. It give the day filtered light
6. It can constrcet quick and durability
7. Quick installation
8. Low specification weight
9. Large Span
10. Energy efficient
11. Look aesthetics
12. Transulation

Uses:

1. Car Parking Structure
2. Caffee area
3. Hotels and Resort
4. School & College
5. Indoor and outdoor
6. Facades
7. Sports stadium roof
8. Shopping center
9. Residential & commercial
10. Atrium
11. It park
12. Roof top open area
13. Shelters

Tensile structure & shed:

Tensile structures we provide are the best solution for all your needs, weather you are looking for a product for your interiors or exterior. these structure are best suitable for the places which are openly suitable such as garden restaurants hotels, IT Park, shopping center, resorts, sports stadium, builders and office etc., these are manufactured using high quality raw material by our skilled professional that ensure its durability and long life. The wide range of tensile structure is available at affordable prices.

Car parking structure & shed

The car parking structure that protects your vehicle from outdoor weather. Top quality raw materials are used to manufacture these structures, so that they have durability and a longer life. They are available in various colors, and different shape of structure such as, Arch shape, vault shape, hyper shape, cantilever structure conical and shape. Material using membrane PVC coated & PVDF 5-15 years warranty.

Entrance Tensile Structure & Walkway Cover

Entrance shades cover the entry area of your homes, offices and restaurants and keeps the protected from the sun's Uv rays. Offers customers employee, tenants and visitors protection from heat, rain and harmful UV rays travel by foot and from destinations points at your location. The walkway tensile canopy, we installed building to building and entrance gate to administrator office block, retail spaces, hospital, school and college.

Tensile Canopy

Our range high quality water proof tensile canopy as per feet for outdoor, classroom, play area walkway, dining area. Our tensile canopy, umbrella and free standing tensile canopy. Outdoor Sitting Canopy

Protect children from harmful Uv whilst providing safe open air environment to learn and to play ground, outdoor canopies teaching & waiting areas.

Tent Structure

We provide unique tents for events; product launched parties, all outdoor events and exhibition. Our tents are made of PVC coated fabric and ms steel frames or powder coated frames or GI frame. We have a wide range of customized sizes and easy to install. Attractive tent for all occasions.

Conical Tensile Structure

The conical shape tensile structure provides aesthetic look it create ambience a large can be covered with minimum column, you have better use and the high center point creates, the outdoors Feel and eye- catching in design.

Shade Sails

Shade sails are used to cover the open areas of your residence such as garden area, pathway cover, pool cover, caffee area, car park; long life PVC coated fabric, mesh fabric.

Structure Fabrication

We provide completed services designing, fabrication, installation Steel fabrication drawing geometry and analysis wind load structure, frame work mild steel in either painted or galvanized finish or polyester powder coated, cable and fitting marine grade(316) stainless steel fitting and using aluminum extrusion.

Stadium Roof Tensile Structure

Etacon has unique expertise designing, fabrication, installation tensile cantilever long Span stadium roof structure. Using mild steel hot deep galvanize frame supported by steel cable. Roof material 5-15 years life. PVDF membrane & PTFE membrane.

Tensile Pool Cover

The cantilever structures enough shade and enough sun. The cantilever structure at edge of the pool or around the pool is required with damaging Uv rays. and much need sun protection sails structure are commonly most shape tringlour or hyper according area you have and the effect you want to create.

Inverted Cone Umbrella

The inverted cones are designed fabricated and installed as a unique design with an integrated down spout that links into the site storm drains. There is no need for a down spout and gutter; the highly durable PVDF coated membrane will deliver excellent performance. Inverted umbrellas are sitting on the walkways, drop of zone entrance, visual appeal the building.

Tensile Facades

Facades tensile mesh fabrics give building life more as well as reducing electricity bill. But also prevent solar gain significantly. Reducing the need for air condition in warmer.

Atrium Tensile Structure

Tensile fabric roof structure are not visually appealing but are environmentally sensitive and ecomically competitive as wall as light weight membrane structure, provides a cost effective solution requiring less structure steel to support. The roof enabling long span & column free space. In addition membrane offer building owners reduced constrection cost and maintaince cost compared to traditional building materials.

Indoor Tensile Structure

Interior structure obvious difference is that material & choice is wider support structure can be much uses ceiling & screen.

Bus Stand Tensile Structure

Bus terminal tensile structure etacon idea was to create a good roofing structure looking innovative.

Gazebo

Our company offers a diverse and attractive collection of gazebo available in various colors and shapes. Moreover, we also provide customization facility to the customers to suit their specific needs and demands. The company is also providing installation services to the customers with expertise.
